IOWA CITY, IOWA, OCTOBER 1, 1879.

HON. C. W. VON COELLN, *Superintendent of Public Instruction of the State of Iowa:*

SIR—Attached we herewith transmit to you the Biennial Report of the Board of Regents of the State University of Iowa, including the Report of the President to the Governor, *ex-officio* President of the Board of Regents, as required by law.

This Report covers the period commencing October 1, 1877, and ending October 1, 1879.

By order of the Board of Regents.

Respectfully,

WM. J. HADDOCK, *Secretary.*

REPORT OF THE BOARD OF REGENTS.

REPORT OF THE BOARD OF REGENTS

At a meeting of the Board of Regents of the State University of Iowa, held Nov. 5, 1879, Messrs. C. W. Slagle, L. W. Ross and H. C. Bulis were appointed a committee to prepare the Biennial Report of the Board for the two years commencing October 1, 1877, and ending September 30, 1879.

J. F. DUNCOMBE, *President pro tem.*

ATTEST:

W. J. HADDOCK, *Secretary.*

TO THE HON. C. W. VON COELLN, *Superintendent of Public Instruction*:

SIR—The Regents of the State University of Iowa submit their Biennial Report for the two years, ending September 30, 1879:

SUMMARY OF STATISTICS.

I. INCOME.

	1877-8	1878-9	1879-80
State appropriation.....	\$35,592.76	\$25,000.00	\$20,000.00
Tuition law department.....	5,030.00	5,541.66	6,500.00*
Tuition medical departments.....	2,565.00	2,587.00	4,920.00*
Tuition collegiate department.....	2,930.00	4,029.95	3,500.00*
Graduation fees.....	594.50	455.00	†
Interest on loans.....	23,095.92	17,673.91	
Incidental items	30.66		
Total.....	\$69,838.84	\$55,287.52	

II. EXPENDITURES.

	1877-8	1878-9	1879-80
Secretary's warrants	\$53,075.91	\$63,362.89	
Incidental bills for treasurer's office...	67.90	2.50	
Balance overdrawn at last report.....	5,002.38		
Total.....	\$58,146.19	\$63,365.39	\$53,232.00

The total for 1879-80 is the gross sum appropriated by the Board of Regents at its June session, part of which is already expended, and is so far included in the detailed report of the Secretary, herewith submitted.

The detailed report of the Treasurer, embodied in this report, shows the total assets of the University, as follows:

Working capital.....	\$218,847.26
Lands unsold, estimated value.....	15,600.00
Total assets, Nov. 1, 1879	\$234,447.26

* These items are necessarily estimated and will fall below the real receipts, since they are based upon the number of students enrolled at the opening of the term, while the experience of the past warrants the expectation of a considerable increase.

† Cannot be determined until the close of the year, but will not fall short of \$1,000.00.

The Secretary's report is brought down to September 27, 1879, and of course includes items not found in the Treasurer's report, which, in its relation to the Secretary's warrants, is brought down only to June 15, 1879. The difference between the two reports, \$3,865.13; increased by Secretary's warrants drawn since June 15, 1879, which amount to \$5,172.42, make the total difference \$9,037.55.

By reference to the last biennial report in which the same difference as to time exists, there will be found warrants between June 15 and October, 1, 1877, representing \$11,129.60. This will show a balance of unpaid warrants amounting to \$2,092.05, indicating a fair degree of confidence on the part of those in whose favor the warrants have been issued. The Treasurer's report gives ground for the confidence in that there is a balance on hand of \$3,614.78.

If the dates of the two reports be made to agree, Secretary's warrants from June 15, 1877, to June 15, 1879, will be found to call for.....	\$118,530.85
Treasurer reports expended.....	116,438.80
Excess of warrants issued.....	\$2,092.05

The following report of the Auditing Committee, presented to the Board at its meeting in March, 1879, shows an exact agreement of accounts to that date.

Hon. A. K. Campbell, a member of the Finance Committee, was designated as Auditor at the June meeting of 1878. At the March meeting of 1879 the following report was presented:

"I deemed it necessary, in order to make my work satisfactory, to examine the vouchers of the Secretary, that we might know upon what authority the warrants cashed by the Treasurer were issued.

"We proceeded to the examination and found every warrant authorized by the Executive Committee, with the exception of ten or fifteen. Further examination showed that these warrants were issued either by direct authority of the Board, or if irregularly issued were yet by authority, and the Secretary came out of the examination with a perfectly clear record.

A. K. CAMPBELL, *Auditor*."

The Treasurer pays only upon the Secretary's warrants, and hereafter an annual comparison of warrants with vouchers will be made.

The following schedule exhibits the names and salaries of the several professors, instructors and other officers of the University, as organized for the year 1879-80:

George Tomlin, Janitor.....	420.00
William Green, Medical Janitor.....	240.00
Assistant Janitress.....	222.00
Assistant Fireman, \$6 per week for time of firing, estimated.	150.00

Total salaries, officers and employees.....\$ 3,732.00

Total salaries fixed for year 1879-80.....\$ 42,507.00

The standing of the Professional Departments for the year 1879-80 will appear as follows:

Law Department—Salaries.....	\$6,600.00
Estimated tuition.....	\$6,500.00
Estimated graduation fees.....	500.00—\$7,000.00
Medical Departments—salaries.....	\$9,725.00
Estimated tuition.....	\$4,920.00
Estimated graduation fees.....	600.00—\$5,520.00

From the above it will appear that the receipts from students in the Law Department are in excess of salaries paid.

In the Medical Departments there is a very great advance toward making the department, self-sustaining.

Since students in the Homœopathic Medical Department receive part of their lecturers from professors in the Medical Department, it is impossible to separate the two in matter of salaries and receipts.

The number of students enrolled in each of the two departments bears about the same ratio to the salaries paid in each.

ENROLLMENT OF STUDENTS—1879-80.

Collegiate Department.....	230

For medical apparatus and charts.....	300.00

Total appropriation from general funds.....\$ 53,232.00

Special appropriation out of Special Repair Fund, for steam heating \$2,500.00

As part of the work entered upon in expenditure of the special appropriation of ten thousand dollars is yet incomplete it is not possible to give the exact figures. But there will remain after present contracts are completed something over \$1,000 to be applied as designated in the act, to the erection of fences and to the completion of stone walks, a sum amply sufficient for the purposes contemplated in the appropriation.

The Regents take pleasure in stating that all their plans as set forth in their report asking for a special appropriation for repairs and for a permanent endowment fund have been fully entered upon, and, so far as possible, have been completed.

All the buildings have been put in a state of thorough repair, and painted and calcimined. Upon all outside work there have been placed three coats of good paint and one coat of sand. Stone walks have been laid, but are not yet quite completed. The central building has been furnished with apparatus for steam heating.

The Departments of Natural Science and of Physical Science have received much needed accessions in the matter of apparatus. The libraries have been enlarged and better accommodations furnished them.

A Lady Professor has been employed with special reference to the interests of lady students, who also does the full work of one professor.

Better provisions have been made for study rooms during the hours when students are not in recitation, and specially increased accommodations for the use of young ladies.

All the conditions enjoined upon us by the legislature have been fully met, and we gratefully acknowledge the benefits that have come to the University through the acts of 1878.

The Regents would here call attention to the reports of the several officers, hereto attached.

The rapid growth of the University in its higher classes renders it necessary to increase all our appliances for instruction. We would express our gratitude for past favors, first, by making wise use of the means furnished us, and, secondly, by developing plans which shall keep the University up to the needs of the State.

Our Permanent Endowment will be of great service in this direction, but we shall soon need more room, and should we be found in the future asking for a supply of that need, the citizens of Iowa will find

abundant ground for such a request in the acceptance of advantages furnished her young men and women through the liberal endowment already made.

Placing ourselves, as was the evident purpose of the legislature of 1878, upon the high ground of an institution furnishing the best possible facilities for collegiate and professional education, and suspending all work which can be well done in the High Schools of the State, we ask for a continuance of the favor already shown, and for such additional means as the wants of a rapidly growing State shall demand for her highest institution of learning.

C. W. SLAGLE,

L. W. ROSS,

H. C. BULIS,

REPORT OF THE PRESIDENT.

*To His Excellency, JOHN H. GEAR, Governor of Iowa, and ex-officio
President of the Board of Regents of the State University.*

I herewith submit to you the Biennial Report of the State University for the period from September 15, 1877, to September 15, 1879.

Very respectfully,

Your obedient servant,

J. L. PICKARD,

President of the University.

IOWA CITY, September 15, 1879.

REPORT.

FULL information regarding the University in its several departments will be found in the published Catalogue for 1877-8 and 1878-9, copies of which have been sent to all members of the legislature of 1878, and other copies will be sent for distribution to the legislature of 1880.

My own connection with the University covers but half the period under review, and I can speak from personal knowledge only of the latter half of the two years.

In entering upon my work, I found the University in excellent condition, much of which excellence is due to the wise administration of my predecessor, President Slagle.

The embarrassments under which the University had labored during previous years had been fully removed by the generous acts of the legislature of 1878.

The growth of an institution of learning must necessarily be gradual. The process of development is slow, and demanding steady advances by regular steps, the plan of which must be determined long in advance of their actual accomplishment. Dependence upon uncertain appropriations is an effectual bar to such determination. Plans cannot be adopted because of the uncertainty as to means of carrying them forward. Small appropriations which are regular are better than larger appropriations made at irregular intervals. The Permanent Endowment authorized by act of the legislature of 1878 has enabled the Board of Regents to inaugurate a system of improvements in the instructional work of the University, which, in the use of this annual appropriation, will result in great and permanent good. The improvement already entered upon is in the direction of a better equipment of our laboratories, and in the better furnishing of our libraries. The benefit is already manifest, and the value of the annual appropriation

will increase in power as successive years shall add to the accumulations of needed apparatus.

The appropriations for repairs and the permanent endowment placed the institution upon a firmer basis, and furnished the means long needed in some departments of its work.

An able corps of professors and instructors was doing a good work, but necessarily limited from lack of appliances. Instruction, how excellent so ever it may be, is wonderfully increased in efficiency if mechanical appliances be at hand for apt illustrations. The working laboratories of an institution of learning supplement the best instruction that can be given. Such a supplement was sadly needed in some parts of the work of this University. Legislative beneficence has enabled us to supply in some good degree the need which until a year ago had pressed so sorely upon us.

Our library has largely increased in usefulness by a transfer to a better room and by the addition of a commodious and pleasant reading room.

The Laboratory of Physical Science has been enlarged and its apparatus increased so that it is believed to be equal to that of many older institutions of learning.

The Laboratory of Natural Science has received an important addition to its apparatus, and facilities for study have thus been increased.

The fund appropriated for repairs is not yet entirely expended. The buildings were found in bad condition, needing new cornices in some parts, and also needing extensive roof repairs. All wood-work required painting, and upon outside work three coats of paint and one of sand were put, leaving everything in good condition for several years to come.

The greater portion of the walks upon the University grounds have been laid in substantial flagging.

The Central Building has been fitted for steam heating, thus saving our libraries and cabinets from the danger of loss by fire, at the same time affording economical and pleasant heating. All this work has been done under contract, and as cheaply as good work can be done. The boiler house has been constructed upon a plan and in a place just suited to the enlargement of our steam heating by including the other buildings, without further cost than the expense of an additional boiler

and the necessary radiators and connecting pipes. Two boilers will furnish sufficient heat for the three buildings.

The change demanded by the legislature of 1878 in the cutting off the Sub-Freshman Classes of the University was anticipated in part by the action of the Board of Regents in June, 1878, whereby the lower of the two classes was discontinued, and the full requirement of the legislative act was met in June, 1879, by the complete discontinuance of the preparatory work. We had expected that the removal of two hundred students (the number enrolled in the Sub-Freshman Classes at the time of the passage of the act) would give us needed room for our collegiate work, and additional room for the Professional Departments. This expectation has not been realized. The number of students at the time of this writing shows a large gain in the college classes of nearly thirty-three per cent, and in the Professional Department a gain of twenty-seven per cent. More than fifty per cent of our loss in numbers is made up at the opening of the first year of the operation of the act, and should our numbers increase as in the past during the year, seventy-five per cent of the loss will be made up by the close of the year.

We have been compelled to utilize all available space in the buildings.

The money appropriated for the Homœopathic Medical Department has been expended in the erection of a building upon a lot owned by the University. The capacity of the building was determined by the amount of money appropriated, but when erected it appeared sufficient for some years to come. Already it is too small for the use of the Department.

The Lecture and Faculty Rooms, especially the Chemical Lecture Room of the Medical Department, are by no means sufficient for the proper accommodation of the students of that Department, and if the healthy growth of the Department continues as it has done for the two years past, some provision must be made for their better accommodation.

The Law Department has reached the utmost limit of its possible accommodation. It occupies fully all the rooms that can be spared for its use.

The class rooms used by the Collegiate Department are already inadequate, and classes are necessarily divided. This division of classes is

of service in ordinary recitations, but at times the lecture system is fully as effective in the instruction of classes, and then larger rooms would be a saving in the time required of the lecturers. The School of Engineering has not the needed rooms, and yet nothing more can be given the classes now crowded into a small room.

Respectfully submitted,

J. L. PICKARD, *President.*
